

A close-up photograph of a professional espresso machine. A hand is visible on the left, holding the handle of the portafilter. Coffee is being poured from the spout into a small metal cup. The machine has a polished metal finish. In the background, there are other components of the machine, including a steam wand and a water tap. A glass with a logo is also visible on the right side of the machine.

Korea Mcnulty Product Proposal

Instant Black Coffee

Coffee that I brew on my own

“Specialty micro ground coffee”

A stick pouch of iBrew specialty blending along with hot boiled water will allow anyone easily enjoy a cup of café-quality coffee, full and rich taste of americano anytime, anywhere. CMGT(Cryogenic Micro Grinding Technology) in the manufacturing process makes its taste and flavor deeper and richer.

Arabica coffee bean

“Arabica 100%”

- iBrew Latte only uses 100% Arabica coffee beans recognized around the world, with which the latte makes wonderful combination of soft taste and sweet flavor.

Latte that I brew on my own

“Taste you would experience from hands of a barista with a convenient recipe”

iBrew Latte uses milk contained creamer which makes deep and soft taste of latte. Also, a CMGT process, grinding original ingredients under minus 196 °C, not only preserves nutrients, taste and flavor that those ingredients possess originally, but makes it dissolve well in water enabling you to drink it easily.
